

**You now have a sustainable,
carbon-free choice.**

Share
Solar

SM

SharedSolar is a program developed by Citizens Electric to give those member-owners who wish to participate an option to receive power from sustainable, carbon-free solar panels.

Participation in SharedSolar is based on your consumption. Members may purchase enough blocks of SharedSolar to achieve 100% carbon-free, sustainable energy without going over average yearly consumption or exceeding sixteen blocks per account. Member Services Representatives can help you determine how many blocks you are eligible for when you call 877-876-3511.
