

## Celebrating One Year of Solar!

**Thank you for making SharedSolar a success!**

It is obvious to the electrical industry that you care about clean, sustainable, carbon-free electricity. With over half of all solar generation from Wabash Valley Power Association (WVPA), our wholesale power provider, being spoken for by only CEC members, your participation has not gone unnoticed. Recently, WVPA announced that they are expanding their solar investment and CEC could be the home to an additional solar generation park!

With additional solar parks being constructed, there has never been a better time to join your friends and neighbors by supporting clean, sustainable, carbon-free electric generation. For less than \$1 per month you can have a portion of your power generated via solar.

**Help increase clean, sustainable, carbon-free electric generation by supporting SharedSolar. For more information or to enroll, call 877-876-3511.** If are already a participant in SharedSolar, send us a photo of other ways you behave in an environmentally conscience way. **E-mail your name, photo, and how you help the environment to [citizens@cecmo.com](mailto:citizens@cecmo.com)**

In August of 2017, CEC began enrolling members in SharedSolar. This exciting alternative energy program gives members more choice on how their electricity is generated and provides a benefit to the environment. Today more than 135 CEC members have taken control and switched to clean, sustainable, carbon-free solar energy. Are you ready to take advantage of this environmentally friendly program?

**Return this flier to CEC or contact us at 877-876-3511 for more information. You can also watch a short video on the benefits of SharedSolar here: [goo.gl/JVmCbc](http://goo.gl/JVmCbc)**
