

POWER MOVES DEADLINE DEC. 31, 2018

2018 Rebates

As we near the end of 2018, it is important to wrap up those time-sensitive projects; including Power Moves rebates. If you have installed a heat pump system or heat pump water heater in 2018, rebates need to be submitted as soon as possible. If you are currently considering installing a new heat pump or heat pump water heater, you will need to finish the installation by December 31, 2018, to be eligible for current rebates.

Heat pumps are much more efficient for heating than electric resistance. Making the switch to a heat pump not only saves you money on your monthly bill, they also reduce demand on the electric grid.

Rebate information can be found at www.CECMO.com or contact CEC at 877-876-3511.
